

MENT®; a tissue-selective Androgen for male contraception

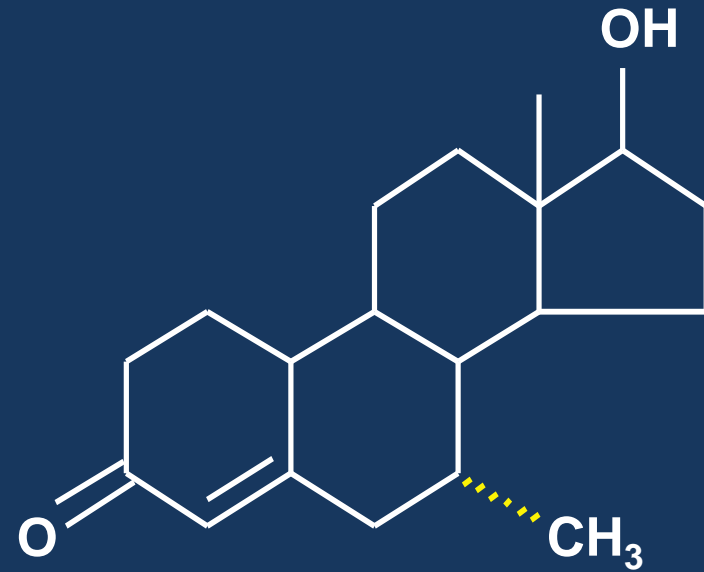

Regine Sitruk-Ware, MD and Narender Kumar, PhD
Population Council & Rockefeller University
New York, NY , USA

- **1st ICMC Congress, May 4, 2016, Paris, France**

MENT™: an improved androgen

Testosterone
(Endogenous androgen)

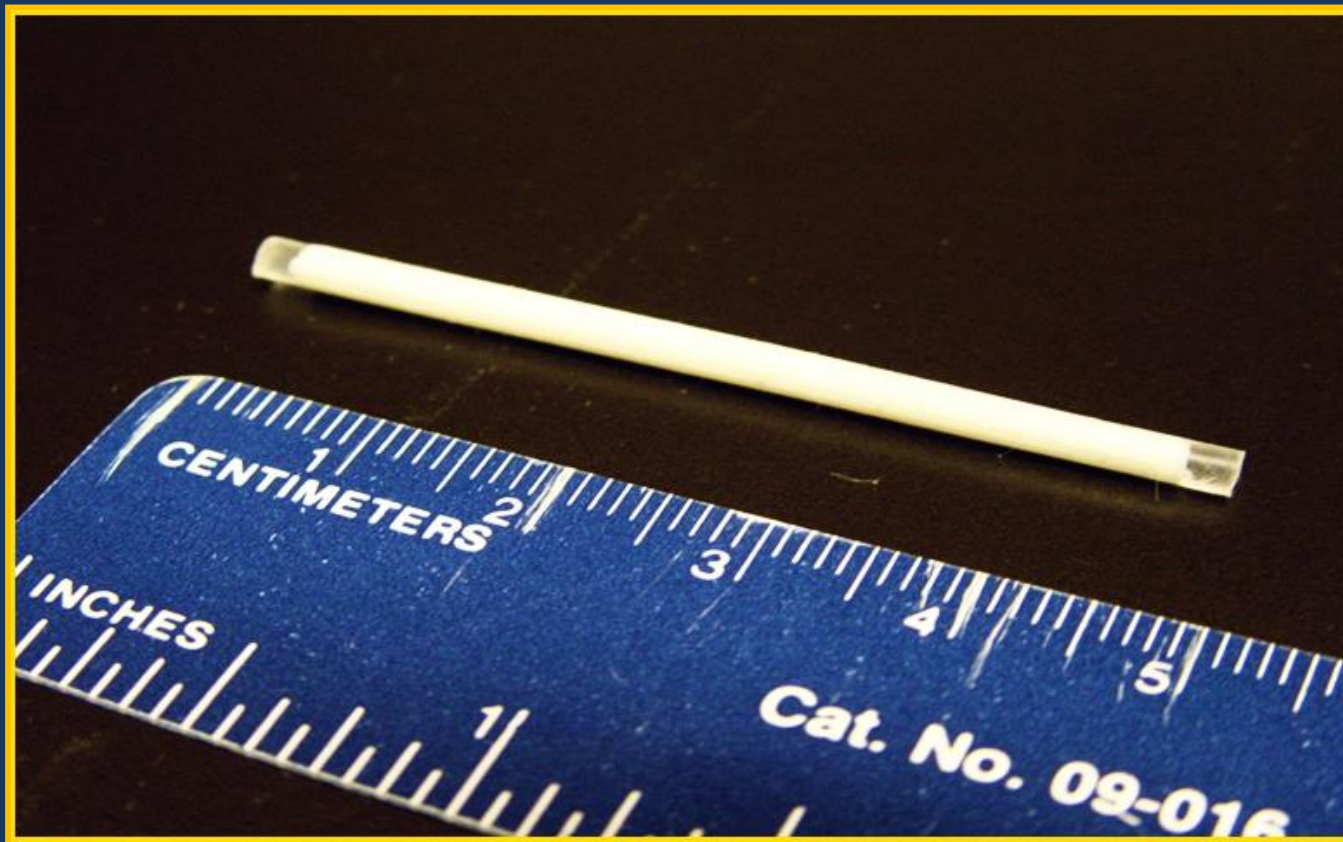

7 α -Methyl-19-Nortestosterone
(Synthetic high potency androgen)

MENT added health benefits

- Not converted into DHT, better for prostate and possibly hair loss
- Possible option for prostate cancer patients for replacement without effect on prostate growth
- Improves lean body mass
- T and MENT in men trigger myelin repair; (Brain 2012)

MENT Implants for one-year contraception for men
